

Wyoming Surface Water Quality Standards Triennial Review

Topic Considerations¹

Classifications/Designated Uses

1. How should Wyoming's designated uses be structured?
2. What designated uses should be included and how should they be defined?
3. How should Wyoming's recreation uses be defined?
4. Should we update the drinking water and fish consumption designated use descriptions?
5. Should we update our drinking water and fish consumption nomenclature?

Recreation Criteria

1. Should we remove the *E. coli* single sample maxima?
2. Should we include narrative criteria for recreation?
3. Should we include cyanotoxins as part of the recreation criteria?

"Human Health" Criteria – Drinking Water and Fish Consumption Designated Uses

1. Should we update the title of the criteria to match the designated uses?
2. Should we include a duration and frequency for the criteria?
3. Should we update criteria based on EPA's 2015 recommendations?
4. Should we retain approach, using most stringent of lifetime exposure health risk, organoleptic and secondary drinking water MCLs?
5. Should we retain our existing cancer risk?
6. Should we include narrative criteria?

Turbidity Criteria

1. Should we revise our turbidity criteria? If so, how?

Implementation Policies and Methods

1. What aspects of the "policies" should be in the rules?
2. What aspects of implementation methods should be outside of the rules?
3. What should the public involvement process be for various implementation methods and should this be captured in the rules?

¹ Compilation of questions from Triennial Topics Presentation given on 3/11/2021 and 4/9/2021.
Designated Uses
